

**NAME**

`includeres` – filter to include resources in a PostScript document

**SYNOPSIS**

`includeres <document.ps >output.ps`

**DESCRIPTION**

**Includeres** includes resources (fonts, procsets, patterns, files, etc.) in place of `%%IncludeResource` comments in a PostScript document. The resources are searched for under the resource name, and with an appropriate extension. The pipeline

```
extractres file.ps | includeres >out.ps
```

will move all resources appearing in a document to the document prologue, removing redundant copies. The output file can then be put through page re-arrangement filters such as **psnup** or **pstops** safely.

**AUTHOR**

Written by Angus J. C. Duggan.

**SEE ALSO**

`psutils(1)`

**TRADEMARKS**

**PostScript** is a trademark of Adobe Systems Incorporated.

**BUGS**

`includeres` does not alter the `%%DocumentNeededResources` comments.
